

St. Helena's wastewater network improvement project

July 2023

Uisce Éireann, in partnership with Louth County Council has completed works to upgrade the wastewater network at St Helena's Dundalk to support future growth and development in the area.

1. Details of the project

Works involved the construction of almost 1.2km of new sewerage pipes as part of a project to improve the capacity of the existing sewers in the area and improve operational performance.

A new rising main has been constructed, beginning at St. Helena's Terrace pumping station to the junction of Coes Road and Point Road. The rising main pipeline at Quay St pumping station was also replaced as part of these works.

This project was delivered to support existing and future developments within the community. It will improve the capacity of the existing wastewater network in the area, improving performance and reducing demands on the current network.

The works were carried out on behalf of Uisce Éireann by GMC Utilities Ltd.

2. What are the benefits of the works?

The benefits of these wastewater network works include:

- **Supporting social and economic development** – This project will facilitate social and economic growth, including planned residential development.
- **Improving the wastewater network** – This project will upgrade the wastewater network, increasing the capacity to deliver reliable, sustainable high-quality wastewater services.

Uisce Éireann would like to thank the community for their patience and cooperation during the delivery of these essential works.
